Re: MUMPS OUTBREAK

---

Comments: Please be advised that we have been notified of 40 known cases of MUMPS in our near vicinity.

If your child is under the age of 12 months, they have not been vaccinated for this and cannot be until they are greater than 12 months. .

Children aged 1-4 years should have received 1 MMR.

Children who are 4 should have 2 MMRs and if your children do not have these immunizations up to date please arrange to come and get them updated with me.

All other adults and older children should also have 2 MMRs

Question or concerns please call Joanne
