

CLAC Bootcamp

Kickstart your construction career!

CLAC has developed a unique training program to help individuals gain the skills they need to get hired in the construction industry.

Program description

CLAC's construction Bootcamp is a two-week training program, with an eight-week paid job placement, aimed at preparing people with a non-trades background to enter the construction industry.

Participants will receive 10 days of online, in-class, and hands-on training prior to their job placement with Ledcor at the Rainy River Mine Project.

Work is available following successful graduation and completion of on-boarding for labour positions and potential truck driver training.

Topics covered include:

- Construction health and safety foundations
- Construction tools and equipment
- Job-site communication skills and conflict management
- Construction-oriented math skills and measuring and layout skills
- How to recognize and mitigate workplace hazards
- And more

Participants will also earn mandatory safety certificates, including Working at Heights, Mobile Elevating Work Platforms, WHMIS, Confined Space Entry, Ladder Safety, and more.

Additional program supports include:

- Employability skills, upgrading, and job search assistance
- Needs-based financial assistance toward childcare, accommodation, and transportation
- Up to 26 weeks of wrap-around career-based support throughout training and work placement.

Learn more about the qualification and assessment process and how you can refer individuals to this program.
